Work Experience

Freelance Full Stack Developer

Feb 2026 – Present

MPRAR Platform · Euonia · Mincon

Remote

- Architected **MPRAR Central Platform** — a multi-tenant SaaS implementing **single sign-on across 3 products** (HR, Timesheet, Traveller) with company-scoped **Stripe subscriptions** and role hierarchy (Owner, Superadmin, User); migrated legacy Firebase to **PostgreSQL + Express.js** with JWT refresh-token rotation and connection pooling.
- Built **Euonia** mental-health web platform end-to-end: **35+ screens** across Psychologist, Admin, and Superadmin portals; integrated **277 REST API endpoints** from Node.js/MongoDB backend, **Socket.io** real-time multi-room chat, and Recharts analytics dashboards using Redux Toolkit.
- Delivered **Mincon** drilling-operations web dashboard for admins and site managers with **10 Firestore collections** (Rigs, Sites, Operators, Tools, 3 drill-log types, audit trail); role-based access for 3 user tiers using React, TypeScript, and Firebase.

Dehix

Oct 2024 – Mar 2025

Software Engineer Intern

Remote

- Built AI-powered community platform with **real-time group chat** (WebSocket + Zustand) supporting concurrent multi-user sessions; engineered **AWS S3** file upload pipeline with compression and validation, and Google Meet API integration.
- Designed **10+ RESTful APIs** in Node.js/Fastify with SQL query optimisation and **Redis caching** to reduce redundant DB calls; built **LangChain-powered ATS chatbot** with multi-format document parsing across 4+ screens.

Open Source Contributor

Jan 2025 – Present

- Implemented **Project & Board module** with 5 REST APIs and normalised relational schema in Node.js; wrote unit tests to improve code coverage; PRs merged into production codebase of **4+ active organizations**.
- Designed **text-based image search** using YOLO tags; identified and reported a Settings page performance bottleneck with reproduction steps and fix proposal **accepted by maintainers**.

Projects

FormTrack 🐙 🌐 – Lead Attribution SaaS | Next.js, TypeScript, Supabase, PostgreSQL, Razorpay 2026

- Built multi-tenant SaaS with **PostgreSQL Row Level Security** for zero cross-org data leakage; engineered **zero-dependency vanilla JS embed script** tracking UTM attribution across multi-step funnels via cookies — no external dependencies required for client installation.
- Built plain-English attribution engine mapping **10+ ad platforms** (Google, Facebook, LinkedIn) to human-readable lead-source summaries; integrated **Razorpay billing** with HMAC-SHA256 webhook verification and Free/Pro plan gating.

ChillDeck 🐙 – AI Presentation Generator | Next.js, TypeScript, FastAPI, LangChain, LangGraph 2025

- Architected **6-agent LangGraph pipeline** (Planner, Researcher, Writer, Improver, Designer, Image Agent) with Tavily web research; built **RAG + ChromaDB** document pipeline supporting PDF/DOCX/TXT input with **5 export formats** (PDF, PPTX, PNG, Markdown, Notion) and 6 themes.

Coding Collab Platform 🐙 🌐 | Next.js, Node.js, Socket.io, WebRTC, Judge0

2024

- Built **real-time collaborative code editor** for up to 5 concurrent users with Socket.io bidirectional sync; integrated **Judge0 API** for live execution in 4 languages and **WebRTC** peer-to-peer video/audio communication inside the editor room.
- Integrated **Gemini-powered DSA debugging chatbot** with live code context awareness; built productivity suite with Study Streak tracker, Social Feed, Note Management, and contribution graph analytics.

Education

ABES Institute of Technology

Nov 2022 – June 2026

B.Tech in Computer Science (AI Specialization) — CGPA: 7.5

Ghaziabad, UP

Achievements

- Qualified **TCS CodeVita Season 13 – Round 1** competing among **100,000+ participants** nationwide.
- Contributed to **4+ production open-source organizations** with multiple merged PRs and feature proposals.
- Solved **500+ DSA problems** across LeetCode, Codeforces, and GeeksforGeeks.
